Technical Data Sheet
DYMALINK® 9200

Metallic Diacrylate

DESCRIPTION:
Dymalink® 9200 is an ionomeric diacrylate functional monomer for modification of polyolefins. Through reactive extrusions, this additive introduces ionomeric crosslinks increasing mechanical properties and melt strength while maintaining impact and melt processability.

PRODUCT HIGHLIGHTS / PERFORMANCE PROPERTIES:
- 100% active
- No catalyst needed
- Powder form
- High stiffness
- High strength
- Good impact
- Improved melt strength
- Synergy with fillers

SUGGESTED APPLICATIONS:
- TPO
- Thermoforming
- Foaming
