

UTILIZING SUSTAINABLE RAW MATERIALS

Identifying and securing new sustainable feedstocks such as:

Bio-feedstocks

- Sugar beets
- Corn, rapeseed
- Sugar canes

Refined oil

- Vegetable oil
- Used cooking oil
- Pyrolysis oil

Waste valorization

- Fusel oil (Ethanol)
- Investigating other 2G solutions

Partnering for access bio-based and certified renewable monomers for:

- Butadiene
- Farnesene
- Styrene
- Isoamylene

Developing and commercializing biobased and certified renewable products such as:

- Krasol[®]
- Ricon[®]
- Poly bd[®]
- Cleartack[®]
- Wingtack[®]
